Allowable Subject Matter

1. Claims 1-17 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record neither describes nor sufficiently suggests a driving information providing system for collecting data for the analysis of driving information about a vehicle driven by an operator, comprising: a vehicle controller that receives detection signals carrying information about a vehicle operation and operating signals from the operator, the vehicle controller generating control signals for controlling the vehicle; a predetermined data storage for storing predetermined data selected from data appearing in the vehicle controller; a removable memory; and data collection controller that receives the predetermined data from the predetermined data storage, the data collection controller including at least one code entry section for entering desired data in code, and a download section having a download button for downloading data entered in code and data in the predetermined data storage into the removable memory when the download button is actuated, the removable memory being connectable to and detachable from the data collection controller.

These along with further limitations set forth by the claims render the application allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
